Training loss is nearly identical with FP8 activations

Both runs start from the same weights and see the same examples in the same order, so step-to-step jumps are shared.
Right: the per-step loss gap is at most 0.43%; the 8-step average at most 0.19%. Mean gap: +0.02% at 1024 tokens, +0.08% at 4096. One 64-step run per model.
